COMMENTS ON STATEMENTS OF REASONS FOR ALLOWANCE

Responsive to the Notice of Allowance mailed December 21, 2005, the Applicant expresses appreciation for the allowance of the present application. The Applicant notes the Office's Statement of Reasons for Allowance of claims 1-12 as set forth in the Notice of Allowance, but further comments that the art of record, alone and in combination, fails to show, teach or suggest the entirety of each combination of steps and/or structure recited by each of the allowed claims of the present invention.

The Applicant respectfully submits that the Office's Statement of Reasons for Allowance are only warranted in instances in which the record of the prosecution as a whole does not make clear his or her reasons for allowing a claim or claims. In light of the original disclosure, previous Office

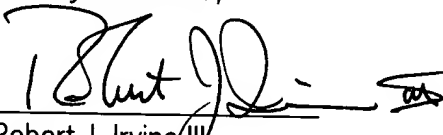

Actions, responses to the Office Actions and appeal brief, however, the Applicant believes that the record as a whole does make the reasons for allowance clear.

Although the Office expressly recited some of the elements of the independent claims 1, 5, 9, 11, and 12, the Applicant understands that the Office has thoroughly analyzed and examined all of the allowed claims in view of the prior art of record and has concluded that all of the allowed claims, in their entirety, recite patentable subject matter. Further, the Applicant does not agree with each statement in the Office's Statement of Reasons for Allowance because it appears to determine patentability on the basis of merely identifying one or more elements of the claims or one or more subsets of elements of the claims not taught by the prior art of record. While the Applicant believes that the claims are allowable, the Applicant submits that patentability resides in the entirety of the combination of claimed elements.

Respectfully submitted,

Date: March 21, 2006
